

Introduction to the GOVTRUST Centre of Excellence

Prof. dr. Koen Verhoest

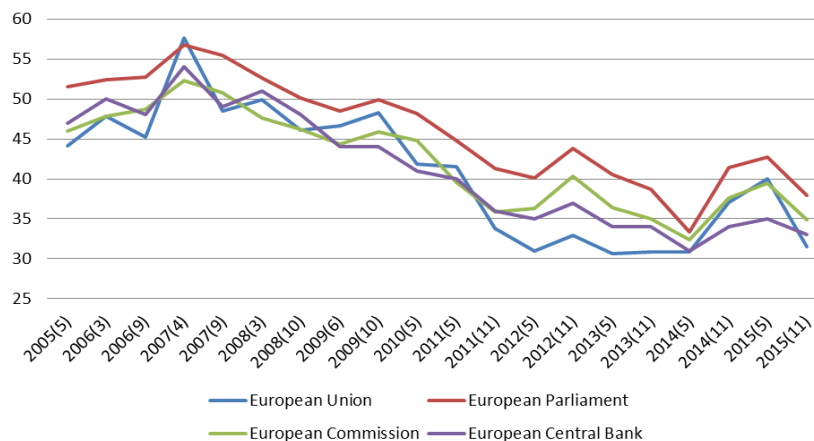

Coordinator of GOVTRUST

Research group Politics & Public Governance

GOVTRUST

'Trust and distrust in multi-level governance'

Pandemic adds to global mistrust in governments

The Mass Population distrusts their institutions in 20 of 28 countries

Europeans trust banks least

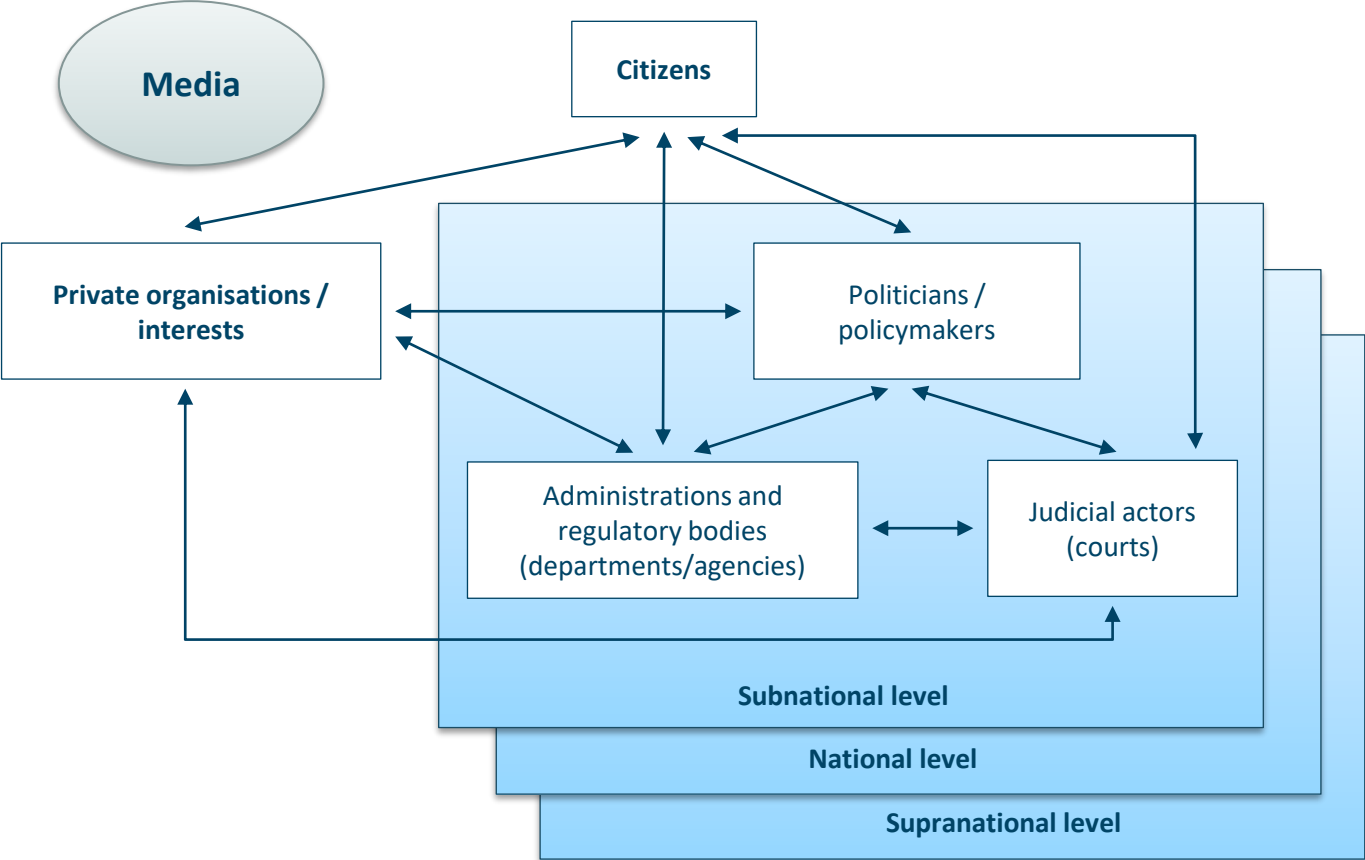

TWICE as many people are concerned with food product safety & quality vs. 5 years ago.

EDITORIAL: Boeing's cosy relationship with regulator undermines trust

Politicians should trust EFSA

Trust in Crisis

For a MLG system to perform well, trust is a fundamental condition...

...but things are a bit more complicated

1) Multi-actor

- Trust of citizens in MLG systems depends on trust relations between actors in MLG systems

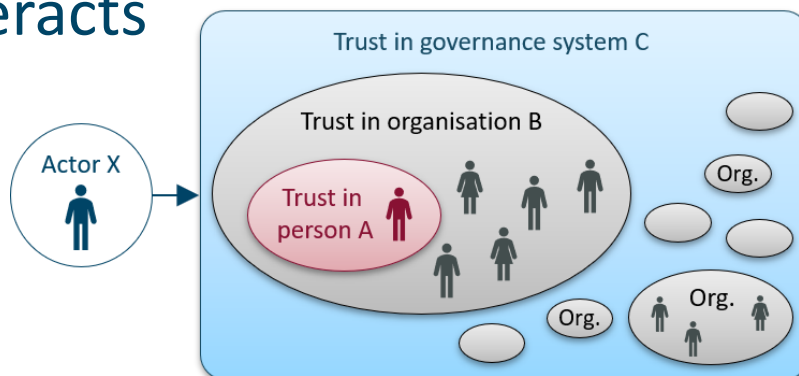

2) Trust matters, but also distrust

- Functional patterns of trust/distrust

3) Dynamics and evolutions

- Processes of trust building/depletion/restoration

4) Trust in persons, organizations and governance systems interacts

Focus

Multi-level governance

- In a variety of settings
- E.g., regulation, cooperation, decision-making, democratic processes, communication, networks, government-citizens interactions, ...

Interactions / relations between actors

- Trust of citizens in the multi-level governance (MLG) system
- Trust between political, administrative, regulatory and judicial actors and involved societal actors at different levels within the MLG system

Trust / distrust

- And related concepts
- E.g., legitimacy, support, legal certainty, reputation, transparency, accountability, democratic quality, ...

GOVTRUST

MISSION

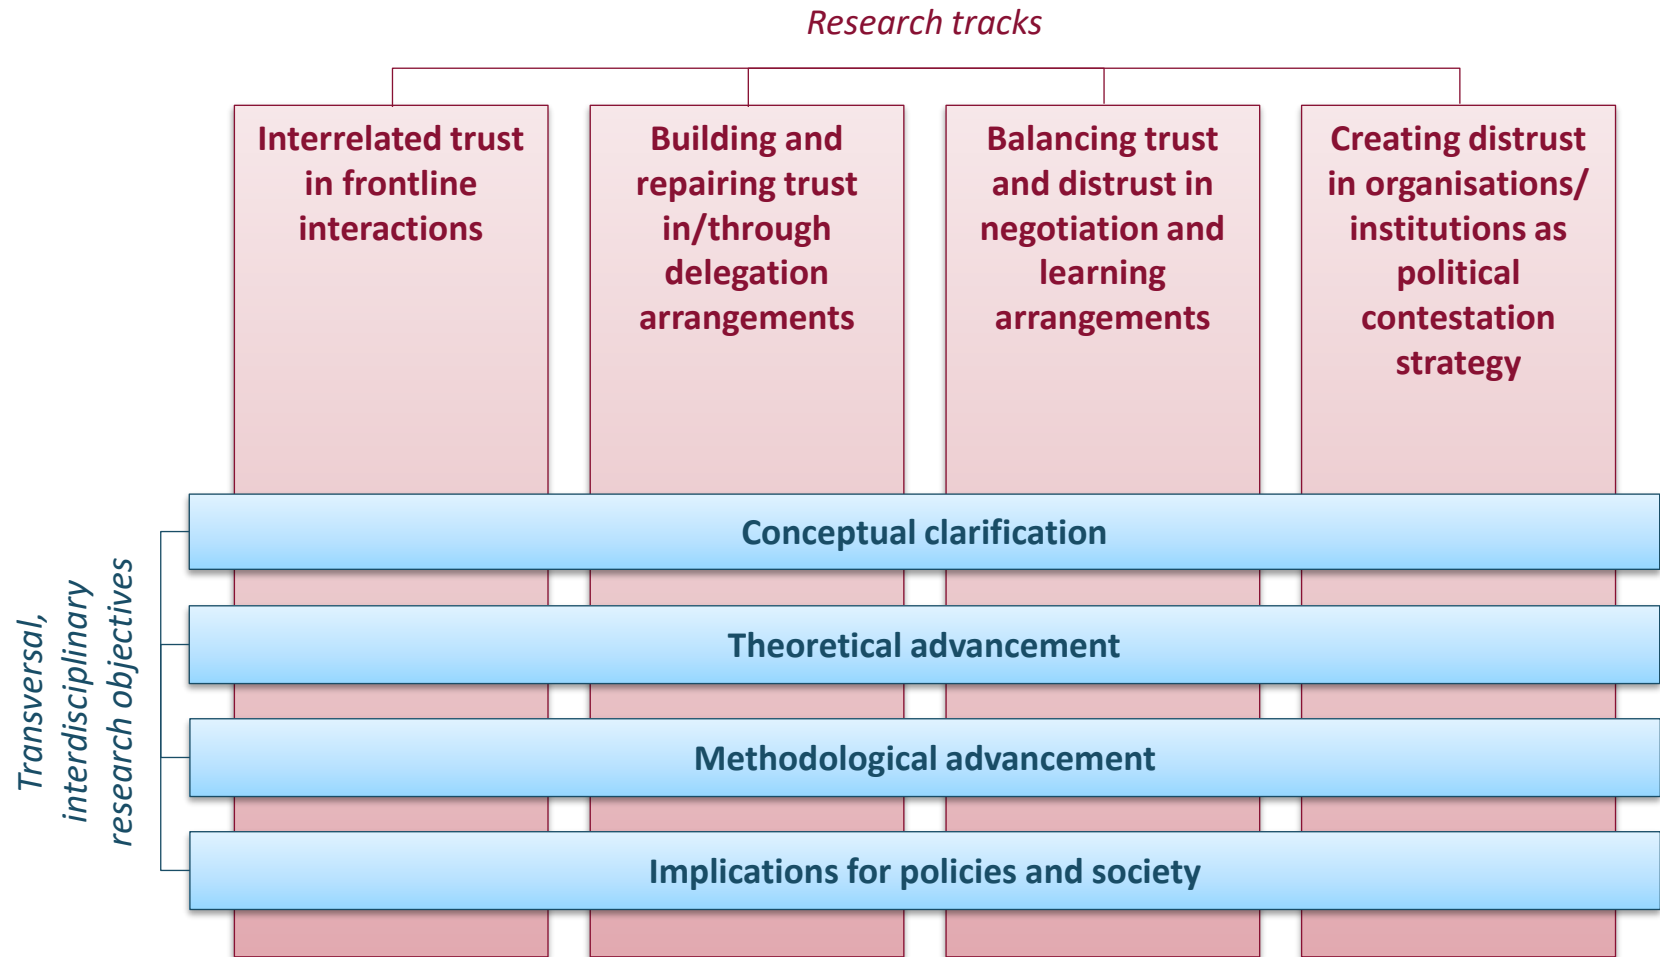

- GOVTRUST aims to provide a **substantial contribution** to our knowledge on the dynamics, causes and effects of trust and distrust in complex governance systems
- Conduct frontline interdisciplinary research with **innovative methods**
- Integrating high-level scientific expertise across **three faculties** and from **five disciplines**: political science, public administration, law, communication sciences and behavioural economics

GOAL

- Overarching research question: **What are the dynamics, causes and effects of trust and distrust in multi-level governance, more precisely between actors involved in designing and implementing regulations?**
- GOVTRUST seeks to have substantial **scientific and societal impact**, and aims to create a thriving research community with a strong multiplier effect

Research programme

Consortium

- Coordination

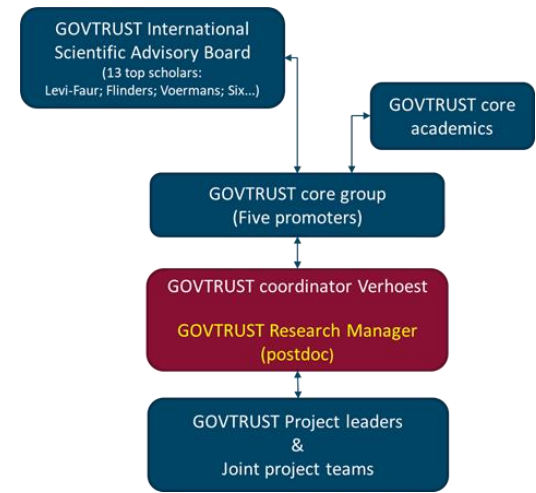

- Koen Verhoest & Esther Van Zimmeren
- Research manager: Sophie Op de Beeck

- Promotors

- Koen Verhoest – Politics & Public Governance (PPG), F. Social Sciences
- Patricia Popelier – Government & Law (G&L), F. Law
- Peter Bursens – Politics & Public Governance (PPG), F. Social Sciences
- Michel Walrave – Media, ICT and interpersonal relations in Organisations and Society (MIOS), F. Social Sciences
- Carolyn Declerck – Antwerp Center for Evolutionary Demography (ACED), F. Business and Economics

- Academic core group

- International scientific advisory board

GOVTRUST 2020 by numbers

15

Projects submitted

11

Led by GOVTRUST

Funding sources

- FWO / BOF
- H2020
- MSCA-IF
- Jean Monnet CoE
- BELSPO BRAIN 2.0
- Flemish government

External partners from...

KU Leuven, UGent, UHasselt, Université Saint-Louis, Université de Liège, VU Amsterdam, Speyer, TiGRE Consortium, ...

3 ongoing projects

2 granted

3 not granted

10 in evaluation

PUBLICATIONS

17

6 A1 journal articles
1 book chapter
4 reports/research notes
4 conference papers - in review

MEDIA OUTREACH

20

12 mentions in newspaper articles
2 opinion pieces
3 blog posts

EVENTS & ACTIVITIES

15

3 seminars
4 internal meetings
4 webinars

Ongoing projects – TiGRE

- Trust in Governance and Regulation in Europe (TiGRE)
 - H2020 Societal Challenge | 2020-2023 | 10 partners, coordinator: Université de Lausanne
 - Insights into the conditions under which regulatory regimes are trusted by analysing (drivers and effects of) trust dynamics between the involved actors
 - Focus on financial regulation, food safety, communication and data protection

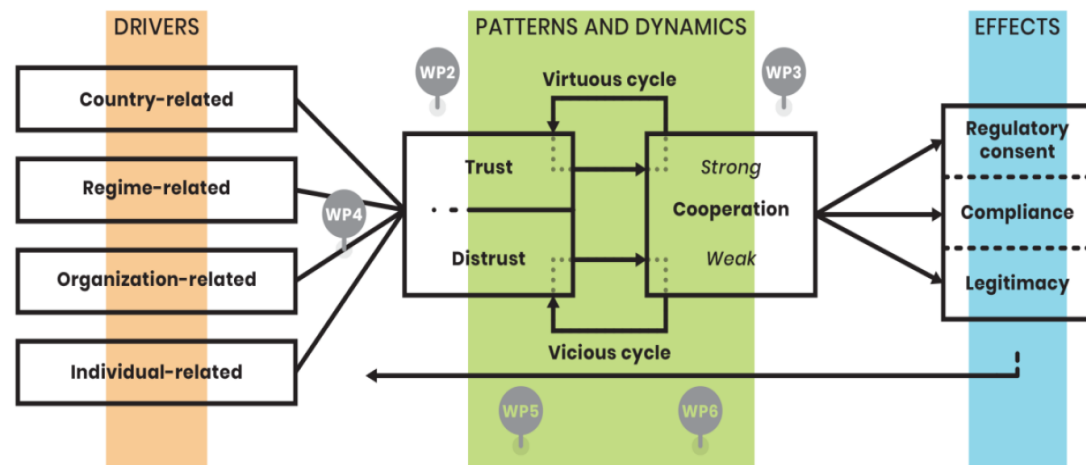

Figure 1.3-2: The TiGRE conceptual-analytical scheme.

Ongoing projects – DIGI4FED

- Digital (R)evolution in Belgian Federal Government: An Open Governance Ecosystem for Big Data, Artificial Intelligence, and Blockchain
 - BELSPO BRAIN 2.0 | 2020-2022 | 4 partners, coordinator: KU Leuven
 - Insights into the use of (big) data to enable better public services through new technologies such as AI and Blockchain
 - WP on ‘Trust in government decision-making based on artificial intelligence and big data’ by citizens and partners
 - Focus on taxes and social security

Ongoing projects – Trust & COVID-19

- Trust, legitimacy and intended compliance with COVID-19 exit strategy measures
 - BOF-UA | 2020-2021
 - Insights into the conditions under which COVID-19 exit measures are socially legitimate, legally sound, and stimulate citizen compliance
 - Evidence on the balance between public health and other values such as socio-economic needs
 - Strategy: experimental approach + legal analysis

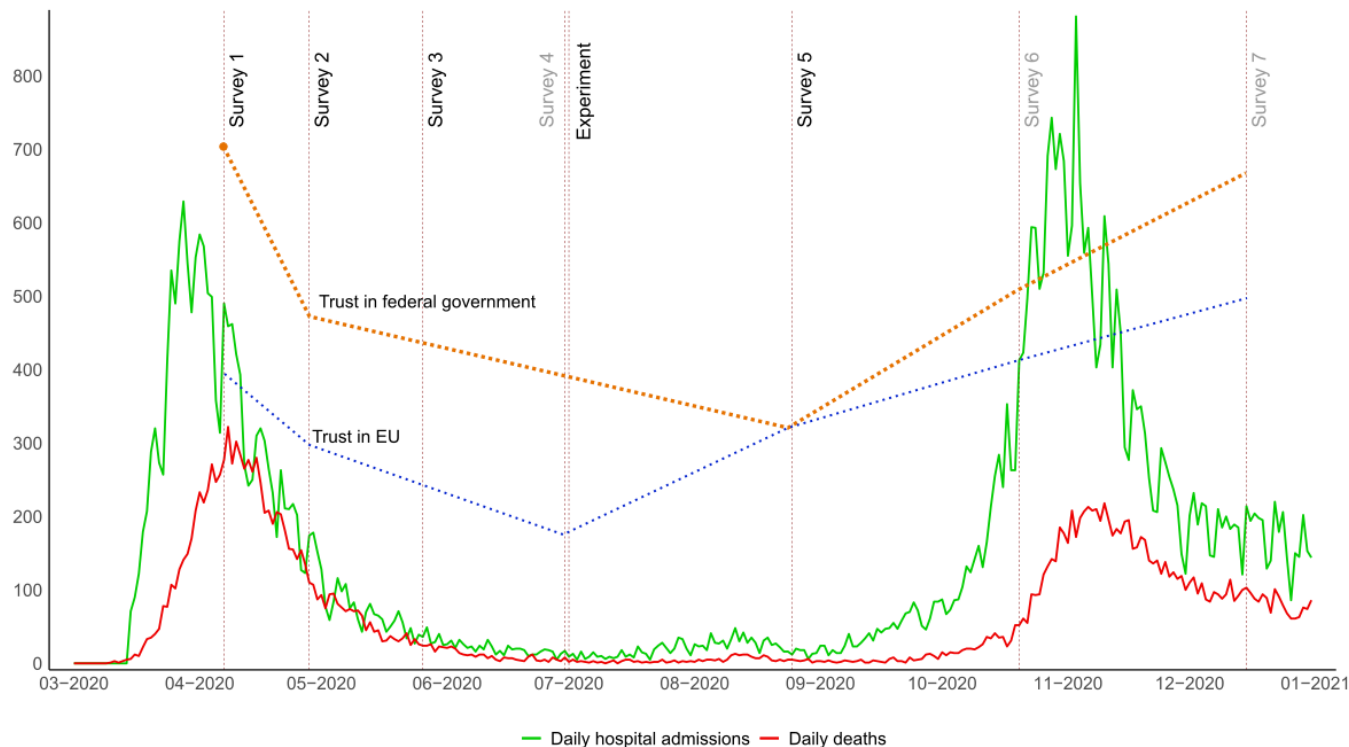

Trust & COVID-19 research

- **Corona Study**

- (two-)weekly survey
- Conducted by University of Antwerp
- Impact of coronacrisis in Belgium

- **Experiment BOF project**

- First survey experiment in June-July 2020 on support for exit measures
