## Zotero Workshop

### *Build a Better Bibliography*

*Lucas Levrouw (TQC)*

Dealing with references is a fundamental part of any research project, be it a bachelor thesis, master thesis or PhD project. For this, it is a very good idea to use a reference manager like Zotero. This allows you to

- Keep all your references in one place
- Easily retrieve bibliographic data from new references
- Manage and automatically download associated PDFs
- Generate bibliographies in LaTeX or Word

This workshop will guide you through the installation of Zotero and the required plug-ins, and will show you how to use all the features listed above. This will make managing references a much easier and more enjoyable task.

**Note: You should bring your own laptop!**
