

VIRTUAL INTERNATIONAL WEEK

Sustainability in road and built construction

Monday 8th - Friday 12th March 2021

Within the **emerging field of Sustainable Cities and Infrastructure**, the University of Antwerp (UAntwerp), University of Girona (UdG), Instituto Superior de Engenharia do Porto (ISEP) and University of Minho (UMinho) are inviting international students to learn more about newest technologies and sustainability visions how to improve the design, engineering, material selection and construction processes for future cities, buildings and infrastructure such as roads, rivers, tunnels and bridges. During this week visions, methodologies and best practices are shared and discussed between researchers and students in order to set the new horizon for the built environment.

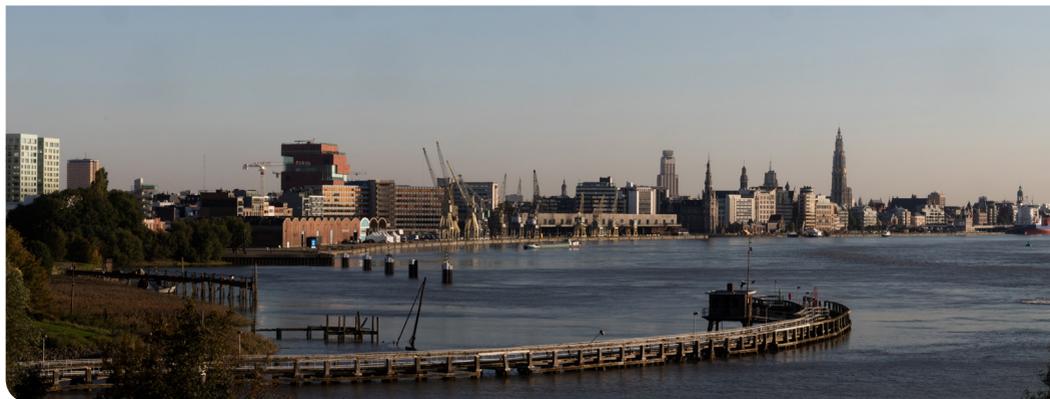

no registration fee

deadline registration | 15 December 2020
