

Session Guidelines

The various session formats are designed to create a lively academic atmosphere, accommodating different presentation preferences and research at various stages. Each format is equally valuable, though they serve different purposes.

Session Types

Single Paper Session

Paper sessions consist of four thematically clustered presentations followed by discussion. Both empirical papers (with data and results) and theoretical papers (background research, analytical perspectives, recommendations) are welcome.

- Session format: 90 minutes; four presenters with 15 minutes each, plus 5 minutes for questions per paper, and a 10-minute general discussion.
 - Chairs are responsible for introducing the presenters, time-keeping, and guidance of the Q&A and discussion.
-

Symposium Session

Symposia allow for focused exploration of a single topic from multiple perspectives. A symposium includes four presenters, one chair, and one discussant, representing at least three different countries.

- Session format: 90 minutes; 15 minutes per presentation (including short questions for clarification), 10 minutes for the discussant, 20 minutes for open discussion.
 - Chairs are responsible for introducing the presenters, time-keeping, and guidance of the discussion.
-

Poster Presentations session

Poster sessions provide opportunities for visual presentation and interactive discussion. We are organizing a large poster 'market' at Thursday sept 17 from 10:15 to 11:45, following the keynote. This will be in the central hall of the building. Poster boards will be available, including mounting materials. Please bring your own poster.

Poster format: A0 (portrait)

Round Table Session

Round tables offer discursive exploration of emerging research, often involving work in progress. Three to five presenters discuss their projects and invite audience feedback.

- Session format: 90 minutes; 3–5 presenters, each with a 5-minute introduction, followed by discussion time divided equally.
 - Chairs are responsible for introducing the presenters, time-keeping, and guidance of the Q&A and discussion.
-

Workshops

Workshops provide participants with hands-on experience of a tool, method, or practice relevant to training, teaching, or research. The aim is to demonstrate and engage, not to present research findings for critique.

- Session format: 90 minutes;.
- The workshop leader(s) are responsible for time-keeping
