

Poster Presentations

- P1.** A shared genomic region underlying disparate ecologically and sexually selected traits in two Lake Malawi cichlids - [Joel Elkin](#)
- P2.** Behavioral Responses of *Lamprologus ocellatus* and *Neolamprologus multifasciatus* to Virtual Avatars - [Louis Marienfeld](#)
- P3.** Hidden infections in a globally important cichlid: parasite ecology, fish health, and stakeholder perceptions in Nile tilapia aquaculture - [Miriam Shigoley](#)
- P4.** Environmental and Social Effects on the Neuroanatomy of Cichlid Fishes - [Bin Ma](#)
- P5.** Exploring the cellular and genetic basis of variation of craniofacial development across divergent cichlid species - [Patrícia Duarte](#)
- P6.** Geographic isolation drives genetic structuring in parasitic copepods associated with Midas cichlids across Nicaraguan lakes - [Fernando Belvis Martínez](#)
- P7.** Melanophore bar patterning in *Maylandia zebra* is controlled by a recessive locus on chromosome 5 - [Bettina Fischer](#)
- P8.** Different trajectories of sex chromosome evolution in two distinct populations of *Neolamprologus multifasciatus* cichlids - [Leno Hinz](#)
- P9.** Who's who in *Rubricatochromis*? - [Stephan Koblmüller](#)
- P10.** The extracellular matrix (ECM) of the cichlids from Lake Tanganyika - [Anja Haefeli](#)
- P11.** Aggression, need and sex mediate influence in a social cichlid - [Boyd Dunster](#)
- P12.** Genomic basis of sexual dimorphism, sexual conflict and male ornament variation - [Vinay Sagar](#)
- P13.** (Cichlid) Parasites for FishBase: an international coordination action to integrate aquatic parasite data into FishBase and SeaLifeBase - [Nathan Vranken](#)
- P14.** Beyond aggression: Cichlids use egg recognition and rejection as a response to cuckoo catfish brood parasitism - [Holger Zimmermann](#)
- P15.** Genome size and body-size variation in the Lake Victoria Region Superflock cichlids - [Niladr Mondal](#)
- P16.** Macroevolutionary Links among Body Size, Genome Size, and Egg Size in Teleost Fishes - [Niladr Mondal](#)
- P17.** Environmental inducibility and convergence of epigenetic marks in African Great Lake Cichlids - [Leia Zhao](#)
- P18.** Early Developmental Scaling Drives Axial Diversification in Lake Malawi Cichlids - [Alisha Dijkerman](#)
- P9.** Tooth be told: Comparative analyses of oral dentition across the Lake Malawi Cichlid radiation - [Lore Danckers](#)
- P20.** Heads and Tales: The evolution of cranial shape in the Lake Malawi cichlid radiation - [Joey Cabasan](#)
- P21.** A machine learning approach to understanding cell movements and patterning - [Isabel Jiah-Yih Liao](#)
- P22.** Spatio-temporal patterns of diet-induced dental plasticity in the lower pharyngeal jaw of *Astatoreochromis alluaudi* - [Arthur Gairin-Calvo](#)
- P23.** Effects of rapid speciation on proteome stability of Lake Malawi Cichlids - [Valentina Burskaia](#)
- P24.** Variation graph and structural variants of lake Malaŵi “benthic” clade - [Ilia Artiushin](#)
- P25.** Insights from a pangenome of over 50 near-complete Malawi cichlid genomes - [Richard Durbin](#)
- P26.** Same vocabulary, different syntax: selective reorganisation of competitive signalling at species boundaries - [Nishtha Pareek](#)
