

HPV Prevention
and Control Board

Breakout Sessions

Cervical cancer prevention communication

Chair: Marc Steben & Eduardo Franco.

- One dose
 - How to communicate the intention to use the vaccine "off label" to the politicians and HCWs
- Social determinants to follow up of HPV+ women.
- Age-specific communication strategies to convince parents and their children to be vaccinated.
- Need to pre-bunk and fact-check rather than debunk.
- The use of toolkits and evaluation of programme change launches to wash up and improve outcomes
- Best practices for getting parent consent in HPV vaccine programs with school-based delivery.

Self-sampling

Chair: Maribel Almonte & Yin Ling Woo.

- Self-sampling tools for community screening.
- Challenges of HPV self-collection and strategies to overcome them.

Effectiveness measurement of HPV prevention programs

Chair: Alex Vorsters & Iacopo Baussano

- Measuring HPV vaccine impact in LMICs –
 - methodologies, when is it needed, global surveillance standards and reporting requirements vs. other VPDs
- Type replacement
 - myth or reality?
