

Spinning tops: equations of motions

Constant Huiszoon
(Antwerpen)

Wednesday, October 23, 2024
14:00-15:00h on campus in M.G.005
Analysis & Geometry Seminar, Antwerpen

Spinning tops represent a broad class of mechanical systems. In this presentation I will give a derivation of the equations of motion which is unique in the sense that it uses a variant of Newton's equations formulated with measure theory.
