

Exceptional collections for algebraic varieties

Marco Rampazzo
(Antwerpen)

Wednesday, February 26, 2025
16:00-17:00h on campus in M.G.004
Analysis & Geometry Seminar, Antwerpen

In this talk, after giving an introduction on the derived category of coherent sheaves, I will review the notion of a full exceptional collection for a smooth projective algebraic variety. I will discuss a few famous examples and conjectures, and some recent results.
