

## GROUP LEADERS

Prof. Dr. Steven Staelens (Molecular Imaging)  
Prof. Dr. Sigrid Stroobants (Nuclear Medicine)  
Prof. Dr. Filipe Elvas (Radiopharmacy)

## RESEARCH AREAS

Radiotracer development  
Molecular Imaging using PET-CT and  
SPECT-CT  
Quantitative pharmacokinetic modelling

## LOCATIONS

Campus Drie Eiken, Building UC 0.60  
Antwerp University Hospital - Nuclear  
Medicine Department, route 11

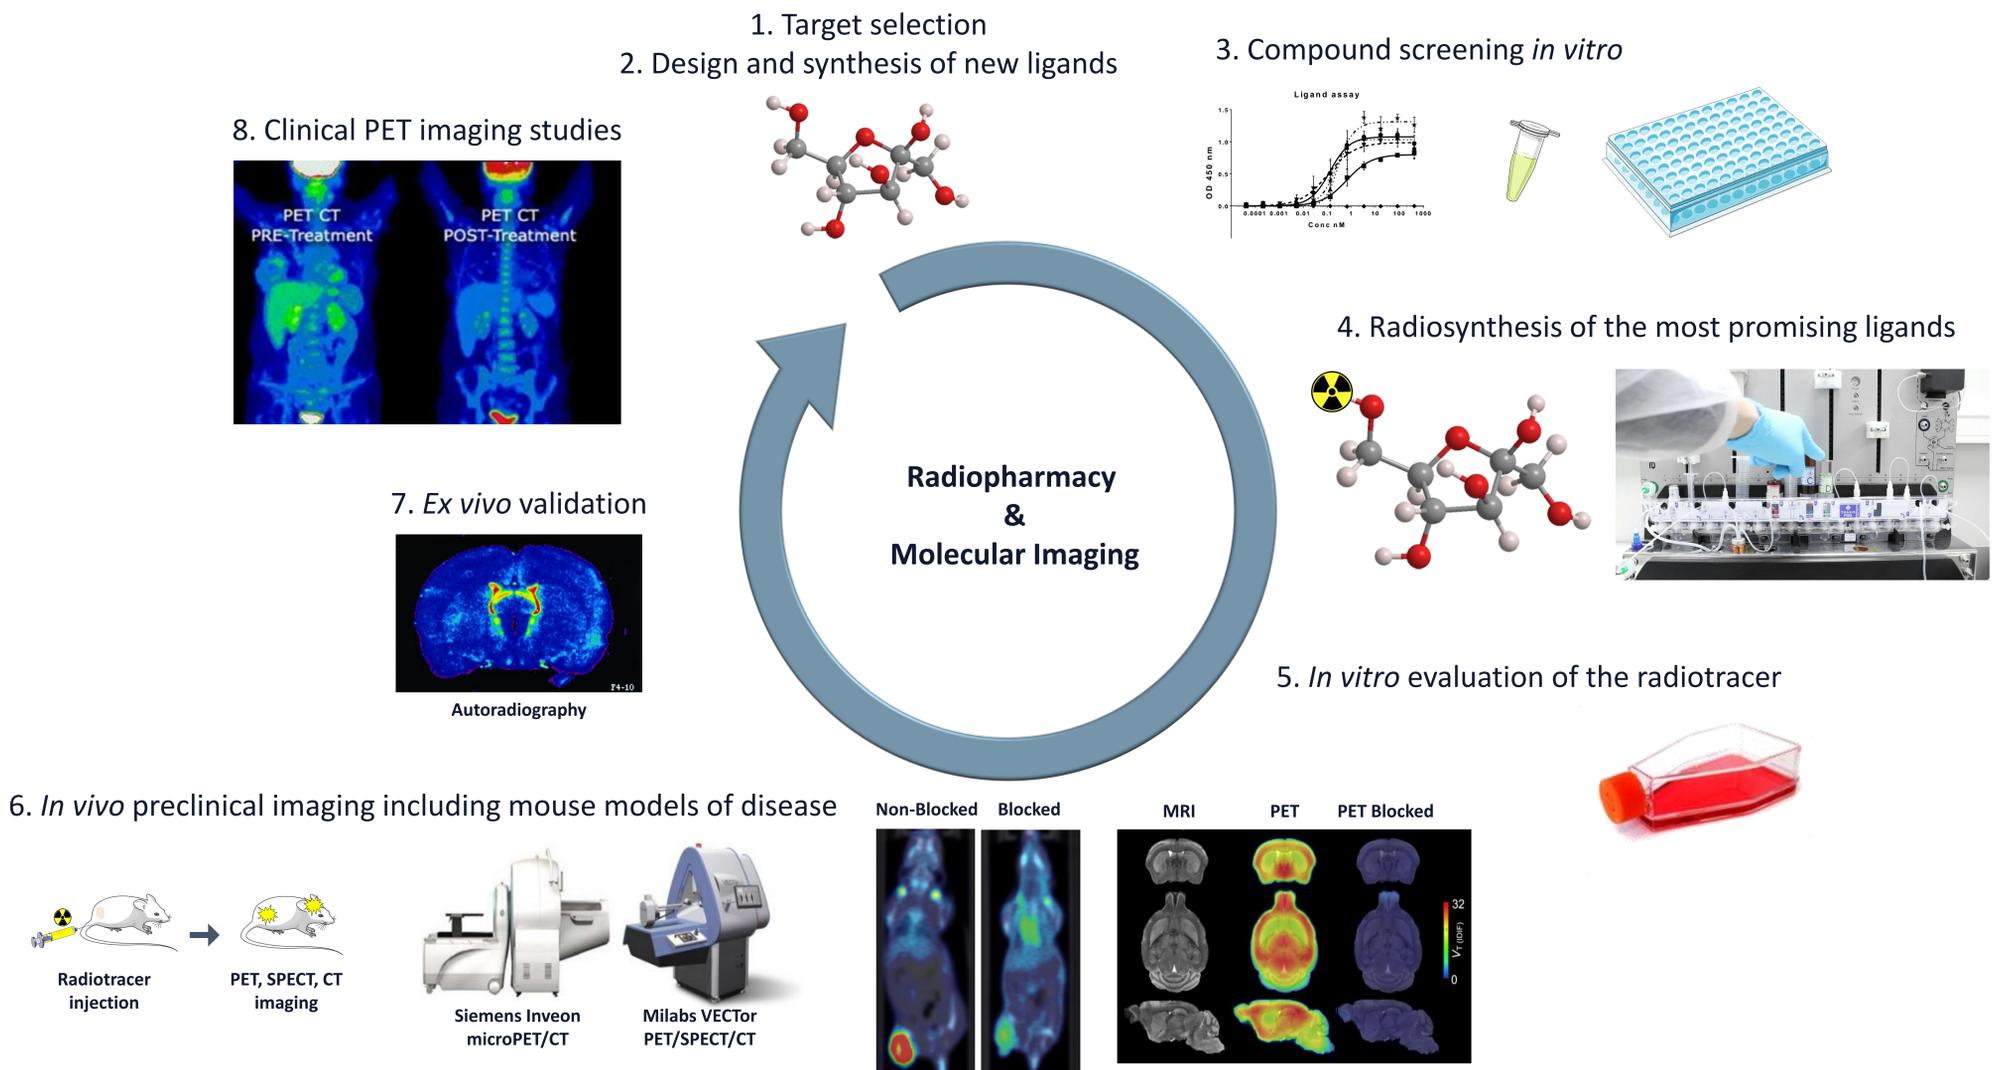

## CONTACT

**Neuroimaging:** steven.staelens@uantwerpen.be  
**Engineering:** alan.mirandamenchaca@uantwerpen.be  
**Radiopharmacy:** filipe.elvas@uantwerpen.be

## RESEARCH FOCUS

The Molecular Imaging Center Antwerp (MICA) is a multidisciplinary team focusing on translational molecular imaging of neurological and oncological processes using PET and SPECT in animal models of disease. Center for Radiopharmaceuticals Antwerp (CREANT) focuses on the development and (pre)clinical evaluation of radiotracers and cancer treatments.
