Nieuwe stap in wereld van AI: bedrijf achter ChatGPT lanceert tool die tekst in video omzet

De nieuwe tool "Sora" kan met behulp van artificiële intelligentie korte teksten omzetten in "realistische" en "fantasierijke" video's van 1 minuut. OpenAI, het technologiebedrijf achter ChatGPT, heeft die tool gelanceerd. Om de technologie zelf te testen is het nog wat vroeg. Eerst moet een groep van academici en experts de toepassing proberen te optimaliseren, zodat ze niet misbruikt kan worden.
