

*Priyanka Shaw* (India) did her PhD in our group from 2017 till 2021, on modelling and experiments for the interaction of plasma with cancer cells (for plasma medicine). She continued her research as a postdoc in our group for 1 year, but since January 2023, she provides technical and administrative support for our group, including safety documentation, computer support, website, plasma reactor lab, support for new group members, and handling order (via Biotech Innovation Procurement Platform).
