

*dr Yury Gorbanev* (Russia) obtained his PhD from Technical University of Denmark in 2011. He did a postdoc at the University of York, and joined our group in 2017, to work on the characterisation of the composition of liquids treated by plasma, for plasma medicine applications, as well as on plasma and plasma catalysis for various sustainable chemistry applications. Since 2024 he is project manager, connected to the Electrification Institute.
