

REGIME SHIFT

An ecosystem approach to studying global change in relation to more persistent weather

REGIME SHIFT

An ecosystem approach to studying global change in relation to more persistent weather

Applied and fundamental topics

Field and laboratory skills

Young and vibrant team

Crucial and relevant research

MP/IP subjects

Simon Reynaert
(Simon.Reynaert@uantwerpen.be)

- Plant diversity
- Carbon or water cycling
- Sustainable solutions for agriculture

Lingjuan Li
(Lingjuan.Li@uantwerpen.be)

- Soil microbial community
- Microbial networks
- Plant-soil interactions
