

3PDS

The Painel de Políticas Públicas para o Desenvolvimento Sustentável (3PDS): MONITORING, EVALUATION AND LEARNING.

João Antônio dos Santos Lima¹, Fábio Bezerra Correia Lima²,
Bruna Maria do Rêgo Troccoli³.

Project description_

3PDS (Public Policy Panel for Sustainable Development, in English) uses three strategic approaches: popularizing technical and scientific information through non-technical language in social media; raising the awareness of citizens, especially young people, about the importance of public policies for sustainable development; and stimulating youth protagonism in social control through advocacy tools.

Alumnus/ a role in project_

João Antônio dos Santos Lima is the founder and executive director of the 3PDS. Fabio is co-founder and deputy director in charge of external relations and partnerships. Bruna is in charge of marketing, communications and fundraising.

Development impact_

The 3PDS has not been launched yet, so we still do not have results/impact. However, we designed a results chain and a program logic to monitor indicators and evaluate our work in the future.

What I learned at IOB? Tips for IOB students_

I believe IOB is an reference among M&E courses around the world because I learned theory and practice. That's why I intend to use these skills and knowledge acquired to potentialize evaluation results.
