

September 2017

New paper contributions by TPR

- Declining function in older adults: influencing not only community mobility options but also wellbe
- The e-commerce parcel delivery market and the implications of home B2C deliveries vs pick-up points
- Housing preferences among students: collective housing versus individual accommodations?

BRAIN-TRAINS: Worst case scenario run analyses

The BRAIN-TRAINS project deals with the possible development of rail freight intermodality in Belgium. The **five deliverables of the worst case scenario** run are now available online, dealing with operations, macro-impact, environmental impact, regulatory needs and government organizational needs.

New TPR doctor: Jack Doomernik

On 3 July, Jack Doomernik successfully defended his PhD on **high speed rail market and performance analysis**. The study has found that, despite the long-running liberalisation efforts, access barriers to newcomers are strong, and incumbents have engaged into high speed rail markets by taking early positions.
