

Invitation

Inaugural lecture Francqui Chair 2013-2014

Prof. dr. Peter Lievens, dean of the Faculty of Science, KU Leuven,
Prof. dr. Joseph Indekeu, chair of the Department of Physics and Astronomy
and Prof. dr. Chris Van Haesendonck, promoter,
have the honour to invite you to

the inaugural lecture of the

FRANCQUI CHAIR 2013-2014

by Prof. dr. Francois Peeters, Universiteit Antwerpen

Graphene and beyond: Physics meets Chemistry

Tuesday June 17th 2014 at 4 pm
at the auditorium of Kasteel Arenberg,
Kasteelpark Arenberg 1, Heverlee

The inaugural lecture by Prof. dr. Francois Peeters will be followed by a reception.
You are kindly invited to join us.

Participation is free.

Please do confirm your attendance on this [website](#) by June 11th.

If you wish to learn more about graphene after this inaugural lecture, you can attend the following more specialized lectures which will be presented by Prof. dr. Francois Peeters in September 2014. Dates and location will be announced at a later stage.

Lectures

- Nanoengineering of graphene
- Mechanical properties and strain-engineering of graphene
- Functionalization of graphene
- Many-particle effects in graphene
- Other two-dimensional atomic layers, e.g. transition metal dichalcogenides
