CHALLENGES

- De ondergrond : protection of water resources
- Morfologie : erosion control
- Hydrografie : limitation of the risks
- De vruchtbare bodem : protection fertility of the soil
- Groene infrastructuur : connecting the green areas
- Landbouw : an alternative to big scale and intensive agriculture
- Wonen : restriction of urbanization
- Mobiliteit : support alternative transport
- Toerisme en cultuur : create 'Schelde' identity
- Industrie : reinvent industry
- Natuurbehoud : reduction of fragmentation and connect

Vision

The future of the Scheldevallei lies in its capacity to respond to the different thematics of the territory and safeguard and valorize the resources.

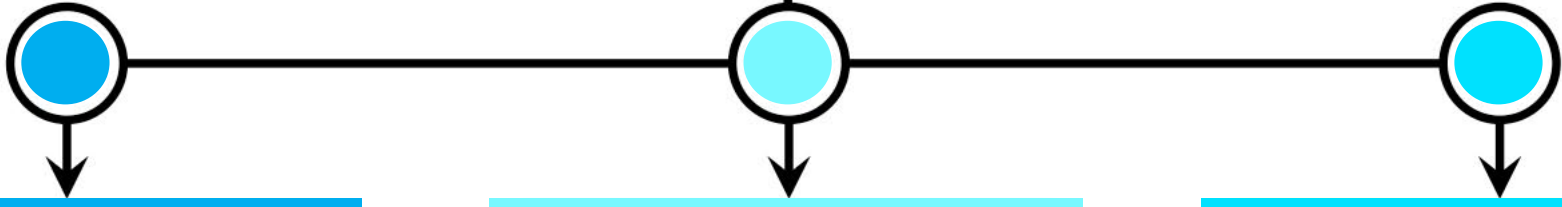

The 5 most important objectives

- Development of the river and its valley
- Water Issues as a priority
- Acknowledgement of the fertility of the soil
- Diversify and connect the green infrastructure
- Create a social awareness
