

# WORKING WITH NATIONAL BIBLIOGRAPHIC DATABASES FOR RESEARCH OUTPUT

Brainstorming session I: Identifying challenges

September 10, 2018: Antwerp

**ECOOM**  
Expertisecentrum O&O Monitoring

# Challenges

Author names

Author affiliations

Publisher names

Missing/inaccurate metadata

Peer-reviewed publications

Publication types

Academic disciplines

Data integration with OpenAIRE

CERIF implementation

Duplicates

Errors

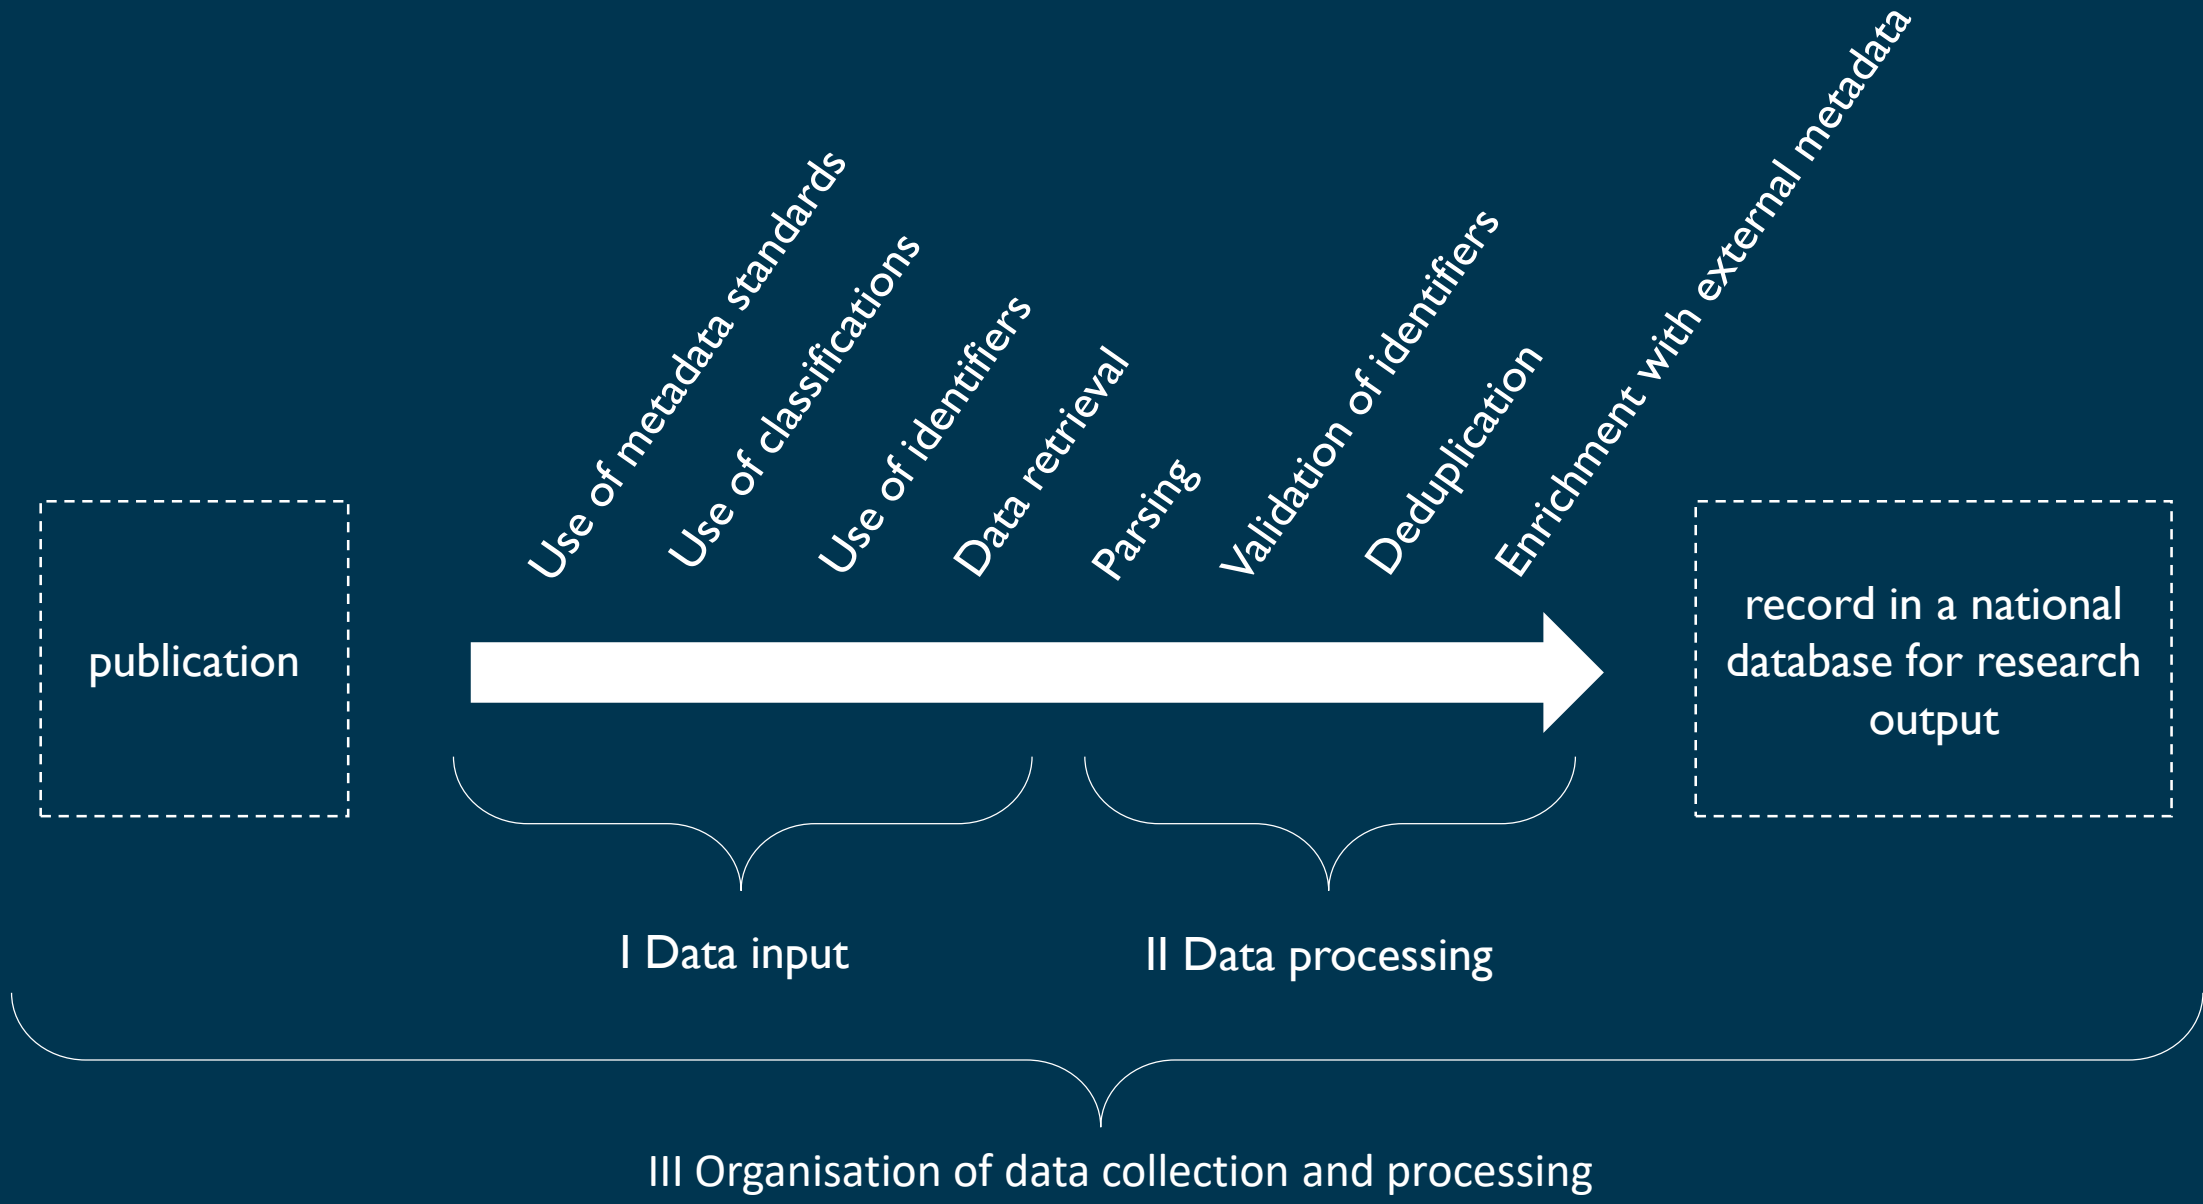

Missing records

Problematic interaction with stakeholders (authors, publishers, government)

Insufficient funding

Multiple national databases

Data use for evaluation

# Task

Until 16.30

Find 4 other people with whom you will work together

Discuss in groups how data collection and processing is organised and carried out in databases each of you work with

Discuss challenges that you encounter in your work

Write them on a sheet of paper

Mark importance for each challenge

(the more dots, the more important the challenge)

Share your insights with others!
