

Working with national bibliographic databases for research output

NARCIS: Towards Research in Context

Chris Baars, Supervisor Digital Services

September 10-11 in Antwerp, Belgium

www.project-freya.eu

The FREYA project

FREYA is a 3-year project funded by the European Commission under the Horizon 2020 programme. The project aims to extend the infrastructure for persistent identifiers (PIDs) as a core component of open research, in the EU and globally. FREYA will improve discovery, navigation, retrieval, and access to research resources. New provenance services will enable researchers to better evaluate data and make the scientific record more complete, reliable, and traceable. By engaging with the global community through the [Research Data Alliance \(RDA\)](#) and other research infrastructures, we work together to realise the vision of fully accessible data. FREYA follows on from the successful [THOR](#) project.
