

MUNI

The Registry of Information about Results (RIV) in the Czech Republic – good servant, bad master

Michal Petr

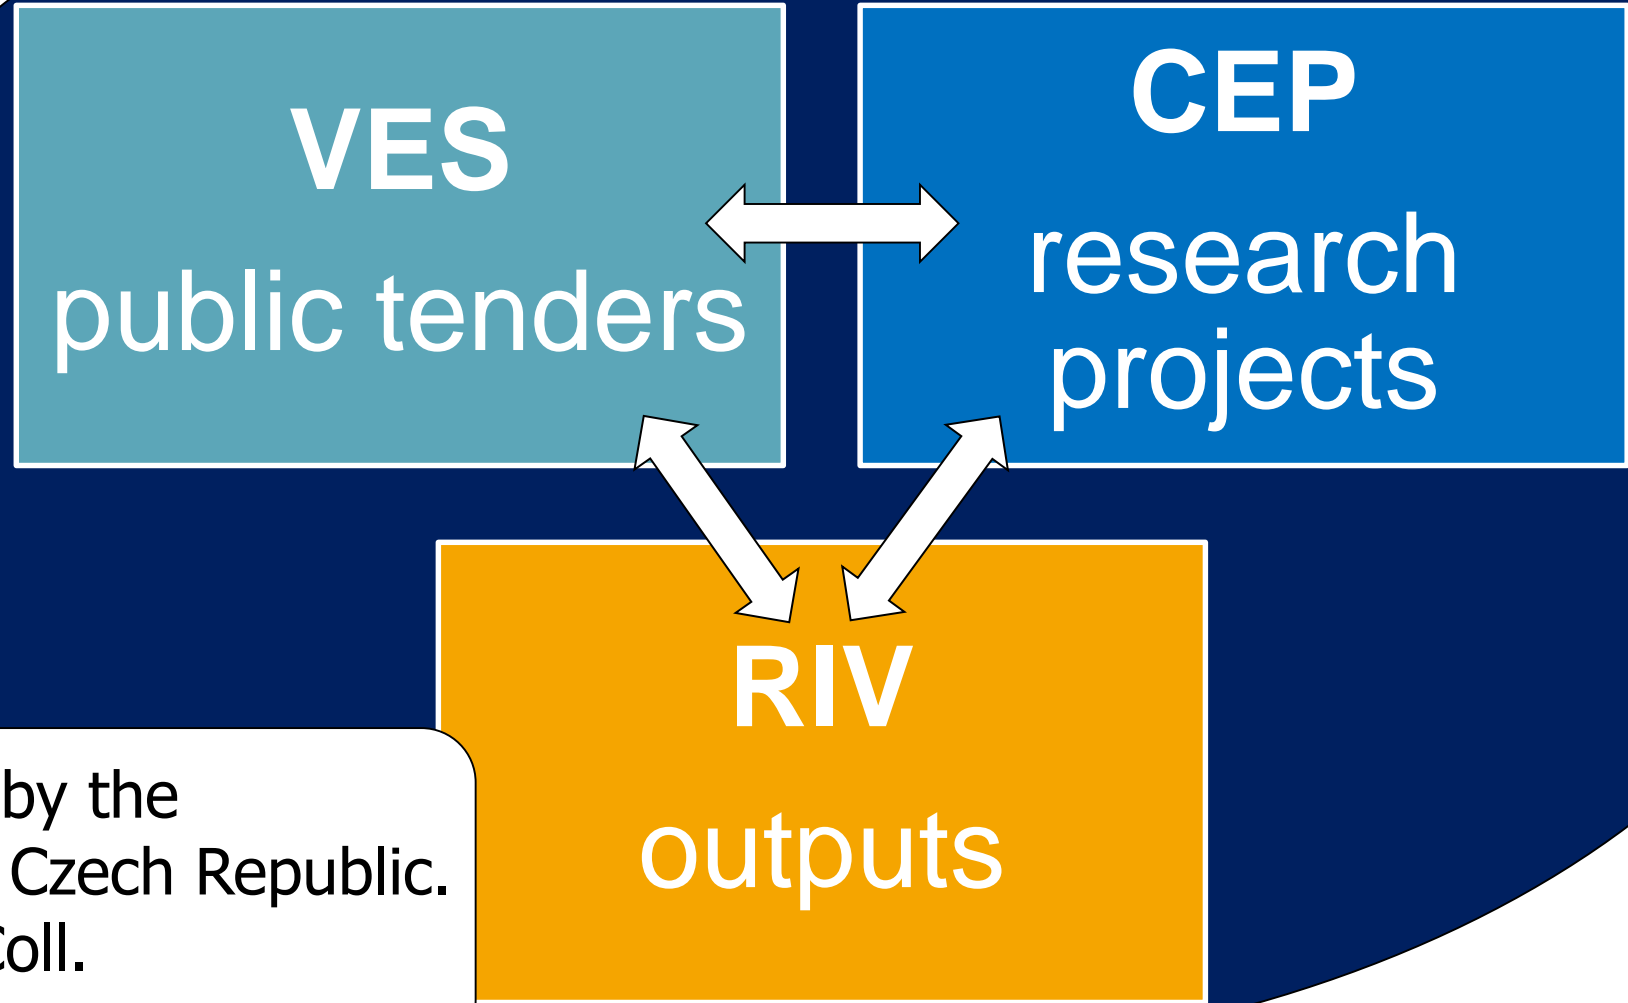

Masaryk University, Rector's Office

Working with national bibliographic databases for research output, Antwerp

10th September 2018

M U N I

IS VaVal 2.0

National CRIS, run by the Government of the Czech Republic. Act no. 130/2002 Coll.

MUNI

RIV

Comprehensive database. Covers:

- all types of outputs;
- all fields, assigned locally (since 2018 Frascati);
- no limit for reporting organization.

Closely connected to **national evaluation**.

Outputs must be always linked to **funding**.

Responsibilities

- 1. Funding providers** must report into the IS VaVal on the projects they fund.
- 2. The beneficiaries (ROs)** must report into the IS VaVal on the outputs of the research they have been performing.

History of IS VaVal

Ca. 1994

- Project data gathering started
- Development of IS VaVal

2008

- First PRFS
- RIV points“

2017

- New Evaluation Methodology

1998

- RIV

2016

- **IS VaVal 2.0**
- New website
- New interface
- New administrator...

2018

- Finer-grained typology
- Frascati classification

Data structure

Xml format (.vav extension)

Documentation is publicly available.

Institutional CRISs are adapted to RIV with local specificities (e.g. additional data fields).

Data fields – mandatory:

Bibliographic information, language

Keywords, abstract in English

Authors

Affiliation of the publication (faculty) = affiliation of selected authors

Identifiers (UT WoS, EID)

Funding

Classification

Data structure

Optional

ORCID, ScopusID, Researcher ID

OA features:

DOI,

full text link (also repository)

Output types

Publication types (peer-reviewed)

Results of applied research

Patent, Software, Prototype, Methodology, ...

Audiovisual work or electronic document

Organizing an event: exhibition, conference, workshop

O - Other result

MUNI

Publication types (peer-reviewed only)

Journal Articles

as of 2018 differentiated:

1. **WoS: only** articles, reviews, letters (**UT WoS** mandatory)
2. **Scopus: only** articles, reviews, letters (**EID** mandatory)
3. **Other:** other peer-reviewed (no verification...)

Books

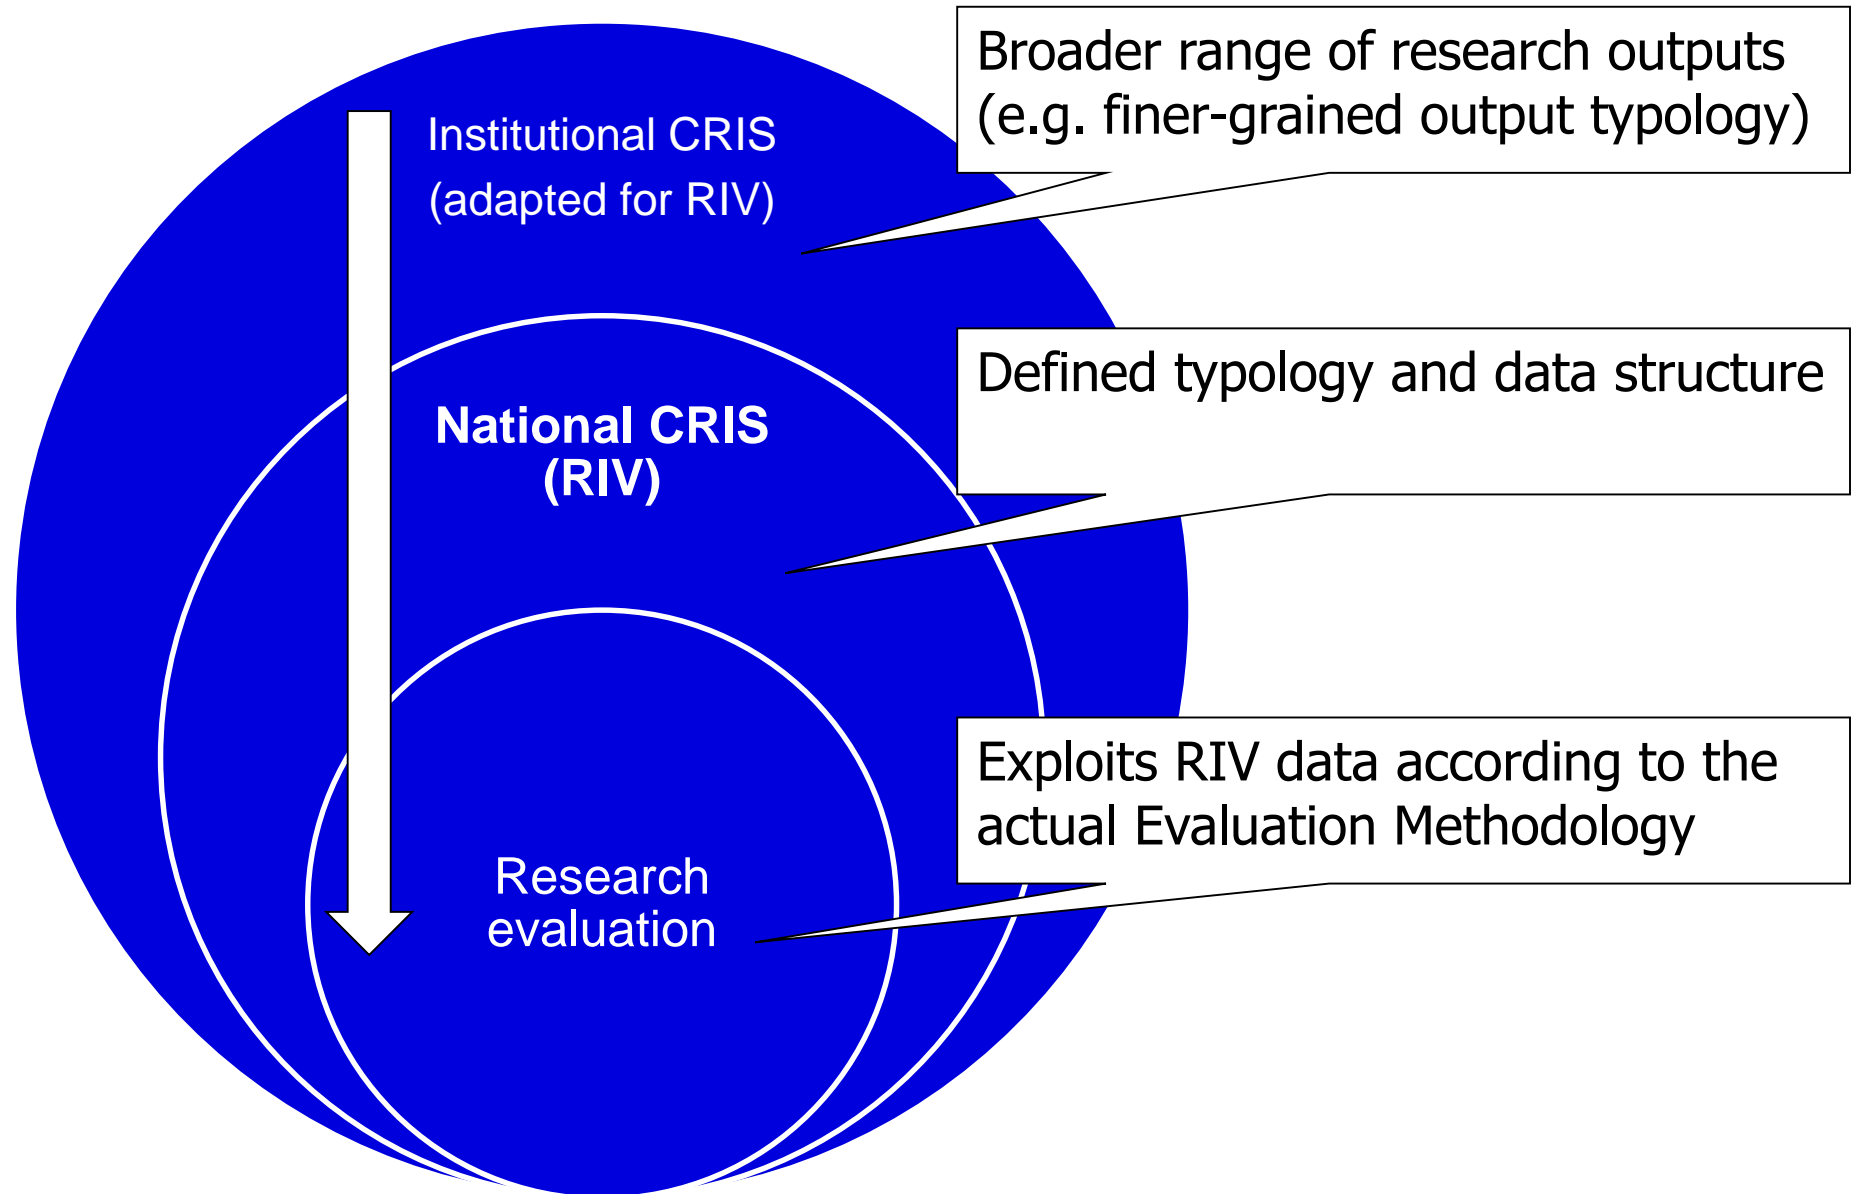

monography (not „edited book“)

Chapters

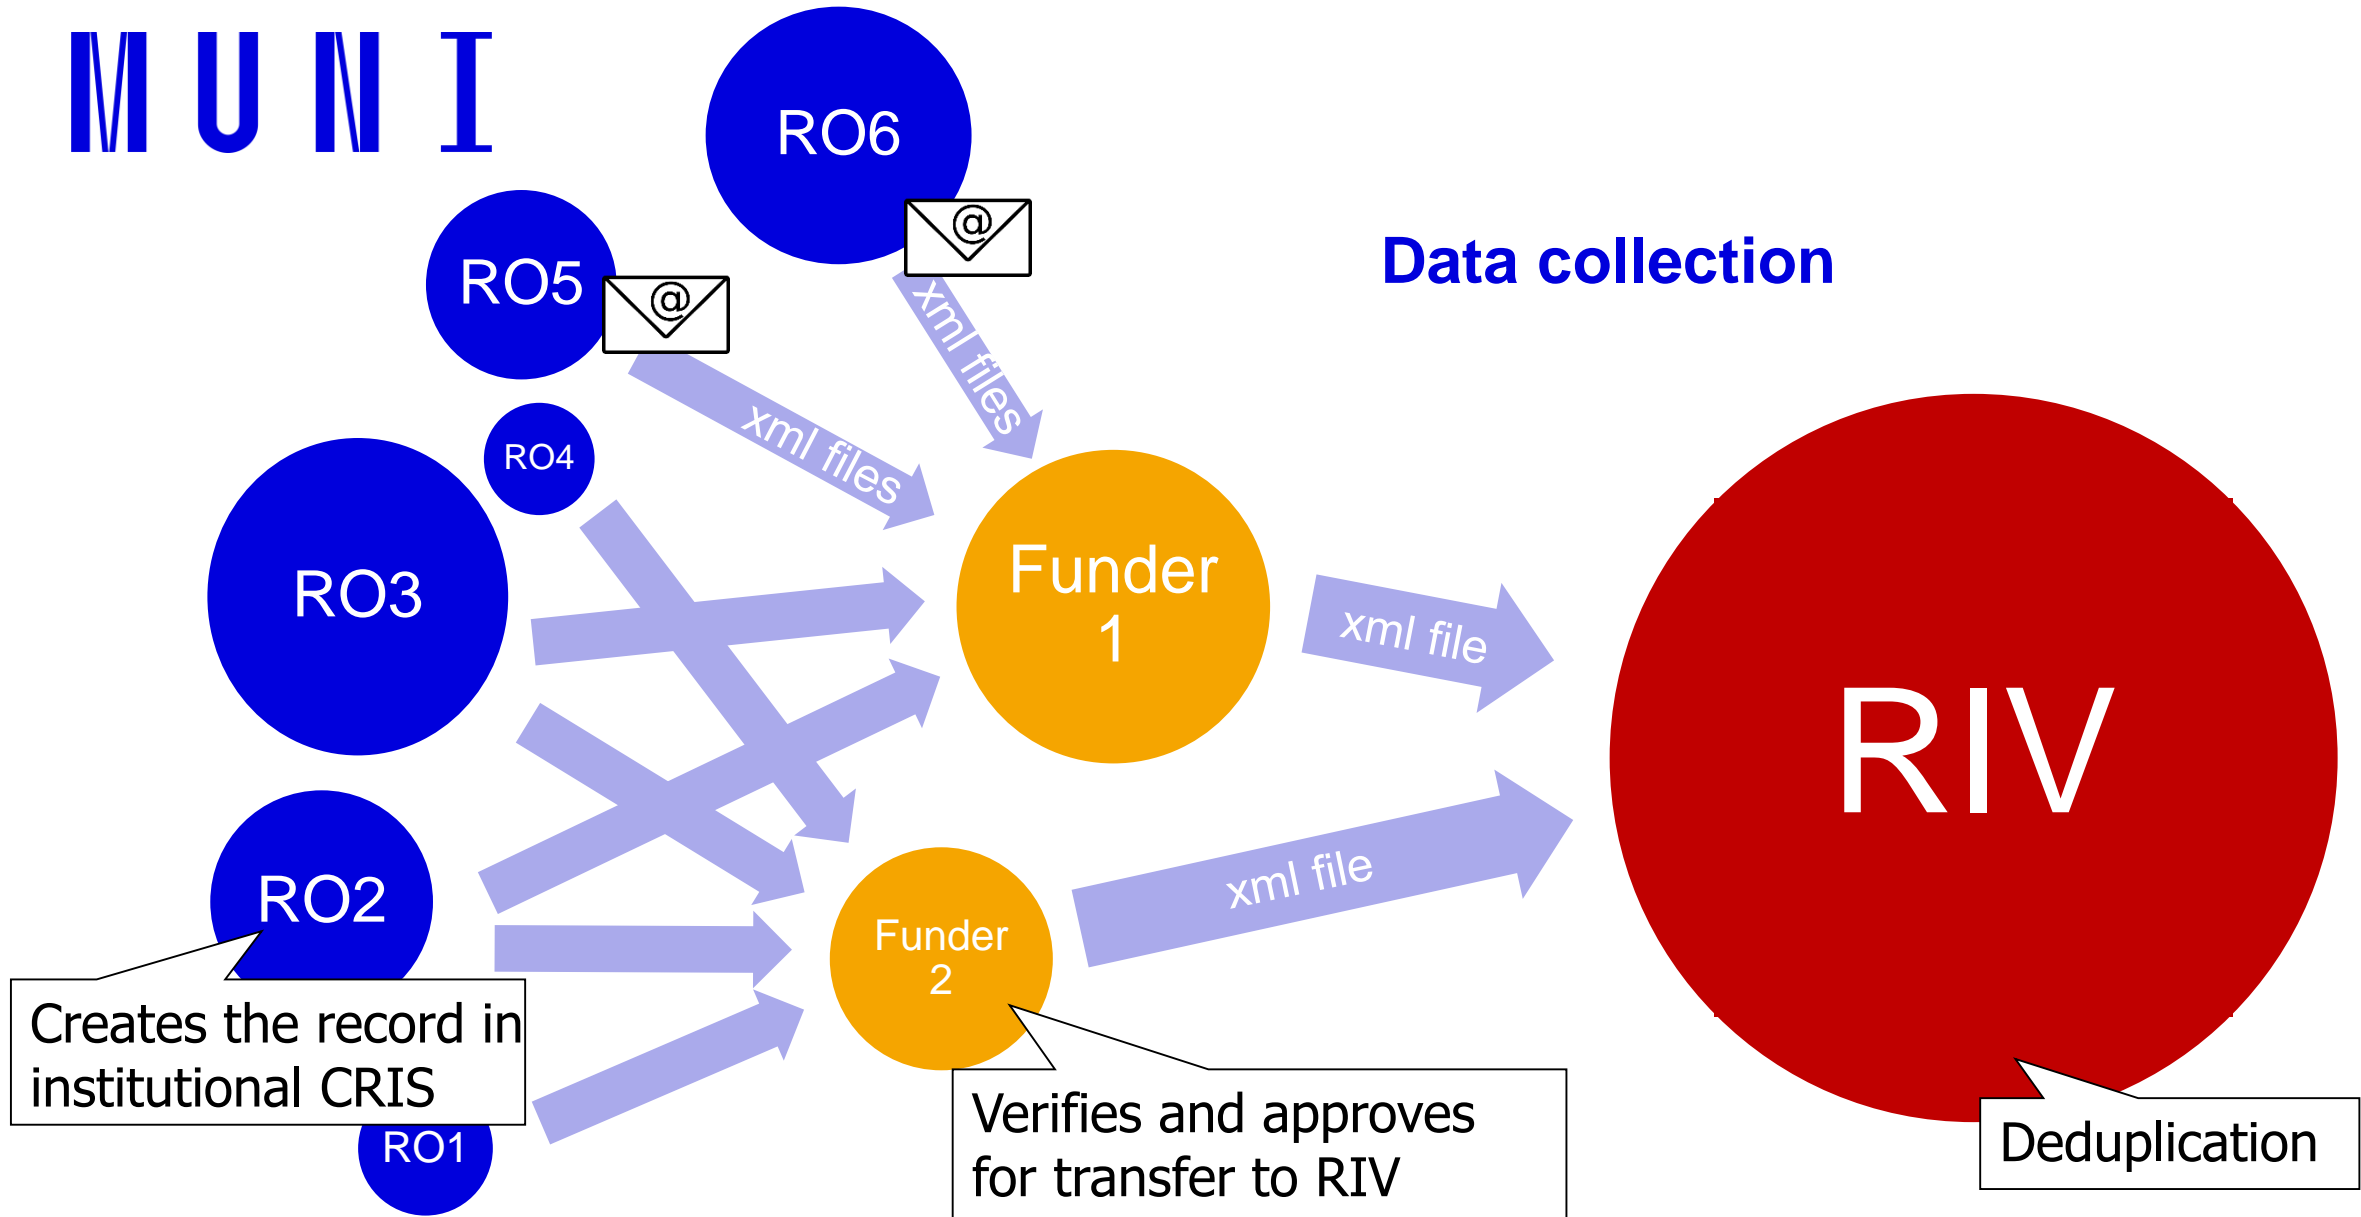

chapters in **edited books**

Proceedings

„proceeding paper“ in WoS, „conference proceeding“ in Scopus, other proceedings (definition similar to journal article)

MUNI

Data collection

Creates the record in institutional CRIS

Verifies and approves for transfer to RIV

Deduplication

MUNI

Accessibility

Publicly available:

All outputs publicly searchable (in Czech only).

Search result downloadable (.csv, .ods, .xml).

<https://www.rvvi.cz/>

Available only for beneficiaries and funders:

Online editing tools – VAVER (in Czech only).

<https://www.rvvi.cz/prijemce/>

The screenshot displays the 'Informační systém výzkumu, experimentálního vývoje a inovací' (IS VAVAI) website. The header includes the logo and navigation tabs for 'Aktivita VaVal', 'Výsledky VaVal', 'Projekt VaVal', 'Výzkumné záměry', 'CEA', 'VES', 'CEP', 'RIV', and 'CEZ'. The main content area features a search bar with options for 'Jednoduché vyhledávání', 'Rozšířené vyhledávání', and 'Vyhledávání tvůrců'. Below the search bar are sections for 'DOPLŇKOVÉ FUNKCE VYHLEDÁVÁNÍ' (with options for 'Výpis výsledků' and 'zobrazit ve vyhledávání jednotlivé výskyty výsledků') and 'ZÁKLADNÍ ÚDAJE O VÝSLEDKU' (with dropdown menus for 'Druh výsledku', 'Kategorie výsledku', 'Jazyk výsledku', and 'Dodavatel dat'). The 'PŘEDKLADATEL VÝSLEDKU' section contains input fields for 'Název organizace', 'Kategorie subjektu', 'IČO organizace', 'Název org. jednotky', 'Kód org. jednotky', 'Příjmení předkladatele', and 'Jméno předkladatele', along with a 'Stav' dropdown menu. The 'TVŮRCE VÝSLEDKU' section is partially visible at the bottom.

MUNI

Why bad master?

For many researchers, **RIV equals the evaluation, became the purpose.**

Adapting institutional policies. Cheating.

...Reporting publications affiliated to another university (foreign researchers).

...Manipulation with classification (assigned locally), publication types.

...Selective reporting (e.g. only results valuable for evaluation).

MUNI

To conclude with Positives...

As of 2017 (new Methodology) many undesired former habits are becoming useless...

The end of counting „points“, focus on „quality“.

As of 2016 (2018 respectively) useful changes in data structure.

RIV is increasingly being used for analyses of the R&D system

e.g. IDEA: <https://ideaapps.cerge-ei.cz/Trendy/en/>; all IDEA apps: <https://ideaapps.cerge-ei.cz/Welcome/>

Questionable interpretation (journal-related indicator, no data cleaning, ...)

MUNI

Using RIV in international studies

Consistent typology of outputs over time.

Research information from the whole country.

Comprehensive database of all types of outputs in all fields.

Interconnecton – identifiers.

Potential limitations

Before 2018:

- unique classification of research fields;

- database identifiers optional.

Poor definition of peer review.

Extremely complicated deduplication.

Thank you for your attention
