MUST READ: Good enough 5G fixed-wireless broadband could change everything

IoT devices will outnumber the world's population this year for the first time

But analyst firm Gartner has slashed its 2020 forecast for Internet of Things devices by 20 percent, or five billion units.

By Liam Tung | February 7, 2017 -- 12:24 GMT (12:24 GMT) | Topic: Internet of Things

Table 1: IoT Units Installed Base by Category (Millions of Units)

| Category | 2016 | 2017 | 2018 | 2020 |
|---------------------------------|---------|---------|----------|----------|
| Consumer | 3,963.0 | 5,244.3 | 7,036.3 | 12,863.0 |
| Business: Cross-Industry | 1,102.1 | 1,501.0 | 2,132.6 | 4,381.4 |
| Business: Vertical- Specific | 1,316.6 | 1,635.4 | 2,027.7 | 3,171.0 |
| Grand Total | 6,381.8 | 8.380.6 | 11,196,6 | 20,415.4 |

Source: Gartner (January 2017)

The 2020 total of IoT devices installed across the world will be more than twice this year's figure, says Gartner.

Image: Gartner

There will be 8.4 billion connected things in 2017, setting the stage for 20.4 billion Internet of Things (IoT) devices to be deployed by 2020, according to analyst firm Gartner.
