

dr. Jonas Wood

Academic curriculum vitae

Professional Profile

PERSONAL DETAILS

Jonas Wood
Sociology Department
University of Antwerp
Sint Jacobstraat 2, B-2000
03 265 50 35
Jonas.Wood@uantwerpen.be
Born in Turnhout
25th of September 1988
Belgian nationality

ACADEMIC QUALIFICATIONS

University of Antwerp

. BSc Sociology 2007-2010
(cum laude)

Eotvos Lorand University

. Erasmus exchange 2011

University of Antwerp

. MSc Sociology 2010-2011
(magna cum laude)

KULeuven

. MSc Statistics 2011-2014
(magna cum laude)

University of Antwerp

. PhD Social Sciences: Sociology 2011-2016 (29.01.2016)

AREAS OF EXPERTISE

- . Quantitative Research, Longitudinal Data Analysis, Mixed Methods Research.
- . Sociology, Labour Market, Human Capital, Population Economics,, Migration, Integration, Gender, Inequality.

TECHNICAL SKILLS

- . Analytical Software: SPSS, STATA, MLwiN, R, LEM, Excel, NVivo.
- . Data: extensive experience with (cross-country comparative) survey data, Census data, large-scale Register data, in-depth qualitative interviews or focus groups.
- . Methods: hazard models, multilevel/mixed effects modelling, panel models, structural equation models, propensity score matching.
- . 2014 Timberlake Econometrics Winter School (Certificate).

PROFESSIONAL DEVELOPMENT

- . Supervised/supervising 22 BA students' dissertations; 9 MA students' dissertations; 2 PhD dissertations;
- . Successful grant (co-)writing: Total: approx. EUR. 960,000
- . (Co-)Supervising 4 research projects;
- . 3 years of independent academic teaching experience;
- . 25 international academic publications;
- . Member Sociology Department Council University of Antwerp; Education Committee MA Sociology, Education Committee MA Social Work.
- . 2020 Award for Best Contribution to 'Immigrants' Integration: Educational Opportunities & Life Chances' International Conference hosted by the University of Bern & Luxembourg.
- . Reviewer Population, Demography, Vienna Yearbook of Population Research, European Journal of Population, Demographic Research, Population Studies, European Sociological Review, Regional Studies, Journal of Family Issues; Research in Social Stratification and Mobility; Advances in Life Course Research; BMC Public Health.
- . Organization Conference: Demography Day, Antwerp University, 24th March 2015. Session Chair European Population Conference 2016, 110: The economic context of childbearing; Dutch Demography Day (2017): Life-course; European Society for Population Economics (2018) Session 30: Ethnic Differences in the Labor Market; Dutch Demography Day (2018) session 4: Parenthood.

LANGUAGE SKILLS

- . Dutch (native speaker)
- . English (native speaker)
- . French (9 years formal education)

COMMUNICATIVE & NETWORK SKILLS

- . Extensive experience in presenting research in both expert and non-expert contexts.
- . Wide national media coverage of research results.
- . Research Stays Max Planck Institute for Demographic Research October 2014/January 2015/January 2019 and University of Stockholm February 2019.
- . Active Member of Flemish, Dutch, British, European, and American Associations for demography and population studies.
- . Active member of research networks on the use of Register data: SIMSAM (Swedish Research Council); Big_stat project at INED in France ([link](#)), Founding member of the Register-Based Fertility Research Network ([link](#)).

CURRENT JOB TITLE

Postdoctoral researcher and Guest Professor in Social Sciences, University of Antwerp ([link](#)).

Research Projects

Jonas Wood studies family and labour market dynamics in Belgium and Europe. Particular attention is paid to varying patterns and inequalities across the life course by population subgroups such as socio-economic groups, gender dynamics, or different migration backgrounds. In addition, context-contingencies such as effects of economic conditions, institutional setting and normative setups are assessed. In order to disentangle varying outcomes across the life course by population subgroups and meso- or macro-level contexts, his research relies on longitudinal econometric or mixed method research designs.

Projects as (co-)supervisor:

The Development of a Register-Based Socio-Demographic Panel to Study Work-Family Behaviour.

01/04/2018 -31/03/2019 (**promotor**) – EUR. 7 500

As a result of the limitations of available data sources in the study of work-family behaviour, this project aims to enhance our knowledge by developing a Socio-demographic panel based on data from the Crossroads Bank for Social Security and the National Register. This data source allows a (i) longitudinal (ii) couple-level assessment of (iii) uptake and effects of work-family policies (formal childcare, parental leave, service vouchers) (iv) for detailed population subgroups. In addition, (v) close cooperation with our partner institutes in other North-western European countries with access to detailed register data will allow to compare work-family dynamics between countries.

Vervolgonderzoek Samenleven in Diversiteit. [“Living together in Diversity”]:

01/03/2019 -31/08/2019 (**promotor**) – EUR. 45 606

This project studies social cohesion across groups with different migration backgrounds in Flanders in a multidisciplinary way, covering five main domains: Social Participation, Identity and Attitudes, Language Knowledge and Use, Labour Market, Education and Upbringing.

PhD Julie Maes ‘Naar een betere arbeidsmarktpositie voor mensen met een migratieachtergrond.’ [“Towards a Better Labour Market Position for Groups with a Migration Background”]:

01/10/2017-30/09/2021 (**copromotor**) – EUR. 309 536

This project addresses work-family dynamics and their importance in activating groups with a migration background, women with a non-European origin in particular.

Labour Migration and Population Ageing: analyzing the effectiveness of current labour market integration and job counselling trajectories for newly arrived immigrants and individuals with a migration background in Flanders. / Arbeidsmigratie en Vergrijzing: een onderzoek naar de effectiviteit van de huidige inburgerings- en bemiddelingstrajecten voor nieuwkomers en personen met een migratieachtergrond in Vlaanderen:

01/10/2018 -30/09/2022 (BOF DOCRPRO, UA) (**copromotor**) – EUR. 200 000

This project uses a newly developed data infrastructure that links longitudinal register data from integration offices, employment offices and social security organisations to reconstruct and analyse labour market trajectories of both the resident population with a migration background (second and later generation migrants) and new migrants entering the country in the period 2005-2016 (first generation migrants), including asylum seekers.

Projects as researcher:

Socio-Economic Differentials in Family Formation: 2011-2015 (FWO-G012011N10 & UABOF-NOILP) (pre-doc):

This project investigated socio-economic differentials in family formation in Europe, 1970-2010. Combining longitudinal individual-level data from the United Nations’ Generations and Gender Program with contextual data on social policy this project also assesses the interplay between context and micro-level behaviour.

Family Policy, Maternal Employment and Fertility Outcomes: 2015-2020 (FWO-project-G032715N) (post-doc):

Using longitudinal individual-level data from the 2001 Census and the Crossroads Bank for social security, this project analyses socio-economic and gender differentials in the uptake of childcare and parental leave in Belgium between 2000 and 2010, and the effects on fertility and maternal employment.

Visieplatform Migratie: 2016-2017 (post-doc) University of Antwerp, Departement Universiteit en Samenleving: This interdisciplinary project integrates Sociological, (Labour) Economic, Anthropological and Legal expertise on the interplay between population ageing, international migration and the welfare state.

Leerstoel Migratie, Integratie en Arbeidsmarkt: Determinanten van arbeidsparticipatie en werkzaamheid van personen met een migratie-achtergrond, met specifieke aandacht voor inburgeringstrajecten van nieuwkomers en de latente vrouwelijke arbeidsreserve: 2016-2019: (VIONA-project) (post-doc): Partners: OASES & Onderzoeksgroep Algemene Economie (Prof. dr. Sunčica Vujić). This project funded by the Flemish Government evaluates Active Labour Market Policies, Language and Civic Integration Policies in Flanders and their potential impact on labour market outcomes.

IMMILAB Improving the Labour Market Position of People with a Migration background in Belgium: 2017-2022 (belspo) (post-doc): In a team of sociologists, demographers, economists and legal scholars - working both in academia as in the federal administration – this project uses a multi and interdisciplinary framework linking rich administrative datasets and surveys, to get a thorough understanding of the complex dynamics of the socioeconomic trajectories of people with a migration background. We seek to uncover hitherto understudied dynamics at the level of the individual migrant, the household and the firm. Partners: Centre for Social Policy, UA (Prof. dr. Ive Marx) & Université Libre de Bruxelles (ULB) (Prof. dr. François Rycx).

Projects as collaborating researcher:

Shifts in the Fertility-Development Nexus at the Macro and Micro Level – Max Planck Institute for Demographic Research, Rostock Germany ([link](#)).

This project aims to address the interplay between socio-economic developments and family formation by analysing rich register and register-like data. At the individual level, the main areas of focus will be on the trends by SES among females, males, or couples; and the effects of selective internal and international migration on fertility in high and less developed areas. At the contextual level, the main emphasis will be on fertility trends by level of economic development, costs of living, and opportunities to reconcile family and career goals. As part of the project, we have set up a European network of researchers called Register-Based Fertility Research Network. It brings together scientists who are collaborating to exploit individual-level and subnational variance in register and register-like data in order to improve our understanding of the recent shifts in the fertility-development nexus.

Big_Stat – Institut National d'Études Démographiques (INED): Big_Stat aims to develop the use of new and recent administrative and survey datasets as they become available for population research. ([link](#))

International Research Stays:

Jan. 2019-Feb. 2019 – Max Planck Institute for Demographic Research (MPIDR): collaboration with dr. Jessica Nisen & director Prof. dr. Mikko Myrskylä.

Jan. 2016 – Max Planck Institute for Demographic Research (MPIDR): collaboration with dr. Sebastian Klüsener & director Prof. dr. Mikko Myrskylä.

Oct. 2015 – Max Planck Institute for Demographic Research (MPIDR): collaboration with Prof. dr. Michaela Kreyenfeld.

Scientific Awards

Award for Best Contribution to the 'Immigrants' Integration: Educational Opportunities & Life Chances' International Conference hosted by the Department of Sociology of Education at the University of Bern (CH) in collaboration with the Institute of Education and Society, University of Luxembourg (LU) funded by Congressi Stefano Franscini (ETH Zurich).

Paper title: Can Training Turn the Tide? Migrant-Native differentials in the uptake and effects of Active Labour Market Policies in Belgium Authors: Tair Kasztan Flechner, Karel Neels & Jonas Wood: Jonas Wood was responsible for the research design and analyses of this contribution and is Tair Kasztan-Flechner's co-supervisor.

https://www.iieolc.edu.unibe.ch/unibe/portal/fak_humanwis/philhum_institute/micro_iieolc/content/e699336/e779664/FinalProgram_MonteVerit_2019.pdf

Teaching Activity

Social demography: 2016-2017 (University of Antwerp, BA Sociology):

This course deals with the key concepts, trends, data and methods, and policy-implications in the three major demographic fields – family formation, migration, aging and mortality – as well as discussing the interrelatedness with other fields such as economics, sociology, social psychology. (Neels, K., Wood, J., & Van den Berg, L. (2017). *Social Demography*: acco. ISBN: 978 94 6344 162 9)

BA Research Seminar: 2017-2021 (University of Antwerp, BA Sociology): ‘Leeronderzoek’ is a practical course in which students carry out a sociological research. The full research cycle, from theory construction to reporting, is treated. In the 2017-2018, 2018-2019, and 2019-2020 Research Seminar, the output produced by students under supervision of Jonas Wood was of sufficient quality to be published in an academic journal, attract wide media attention and/or provide input to policy makers.

Research Seminar 2017-2018: Past iedereen in het plaatje? Bevolkingsdiversiteit en de combinatie werk en gezin in België. [Wood et al. (Accepted for 2020) *De combinatie werk-gezin en het gebruik van formele kinderopvang bij vrouwen met een migratieachtergrond. Een mixed methods benadering. Sociologos*]: A Mixed Methods assessment of the uptake of formal childcare among women with a Moroccan origin in Belgium & Antwerp City.

Research Seminar 2018-2019: Het Grote Antwerpse Studentenonderzoek. [[link](#)]: A large-scale survey documenting the daily life, living conditions, attitudes and needs of tertiary education students in Antwerp, Powered by GATE15, a public organisation geared towards student services. This project attracted considerable media attention (cf. references below).

Research Seminar 2019-2020: A qualitative inquiry of how policy initiatives can successfully ‘burst the bubble’, meaning that international students would interact more with local students in Antwerp, Powered by GATE15.

Population, family and the life course (state-of-the-art): 2018-2021 (University of Antwerp, MA Sociology, MA Social Work). This course provides a state-of-the-art overview of theoretical and methodological frameworks used in the study of life courses, fertility, union formation, union dissolution, migration and population policies.

MA Research Seminar – Population Projections and Simulations: 2019-2021 (University of Antwerp, MA Sociology, MA Social Work). This MA research seminar covers the theory behind projections and simulations, but also assists students in their own policy-relevant population projection and related policy recommendations.

Teaching Assistant Event history analysis: since 2015 (KULeuven, Quantitative Analysis for the Social Sciences (QASS)): Within the advanced Master’s programme in statistics, Prof. Karel Neels teaches the module on event history analysis. My role as a teaching assistant includes the development of exercises in R, the organization of hands-on PC lab sessions, and contributing to the development of the QASS programme through participation in evaluation sessions.

Antwerp Summer University - Europe: Diversity and Migration Summer School: Europe’s demography in terms of ethno-cultural composition is rapidly diversifying in an unprecedented way. The majority group in urban areas is morphing into a minority amidst other minorities. This is caused by the outcome of labour migration in the past, but equally so by continuous migration in the present and the recent inflow of large numbers of refugees. These topics have become a priority issue for policymakers at the national and EU-level. Leading (European) politicians such as Germany’s Chancellor Angela Merkel have claimed multiculturalism has failed as a policy strategy, and new ways of addressing diversity need to be found. At the same time demographers are pointing out Europe’s population will be shrinking if the rate of migration does not increase in the coming decades. There is a great concern from different ideological perspectives on how to deal adequately with superdiversity as it affects all realms of society and as continuing inequalities seem difficult to transform. The third edition of the Summer School ‘Europe: Diversity and Migration’ addresses these issues from an interdisciplinary perspective and in doing so, provides participants with insights, practices and skills to understand the current transformation of Europe ([link](#)).

Supervision of BA & MA Dissertations

Bachelor dissertations:

Vincent Coene, David de Smalen, Noor D'hanis, Robbe Geerts, Koen Keizer, Fiene Keppens, Lore Majeau, Thomas Ronda, Joost Vanheeswijck: "Past iedereen in het plaatje? Bevolkingsdiversiteit en de combinatie werk en gezin in België." ["Population Heterogeneity in the Combination of Work and Family"], 2017-2018 (Supervisor)

Willems Thomas, Mousset Christophe, De Ryck Lukas, Dallenés Hanne, Decoster Fredericke, Vercauteren Lieselot, Liedtke Deborah, Van Steen Alicia, Heyman Sofie: "Het Grote Antwerpse Studentenonderzoek 2018" ["The Great Antwerp Student Research 2018"], 2018-2019 (Supervisor)

Eva Hendrickx, Silke Maes, Elena Van Hoof, Janne Peeters: "Doorprik de bubbel. Hoe social contact tussen lokale en internationale Antwerpse studenten bevorderen?" ["Bust the Bubble. How to stimulate social contact between local and international Antwerp students"], 2019-2020 (Supervisor)

Master dissertations

Liesbeth Devos, MA Social-Economic Sciences: "Neighbourhood effects on patterns of family formation in migrant populations in Belgium", 2015-2016. (Co-supervisor) (Great Distinction: 17/20)

Senne Wouters, MA Sociology: "Regionale beschikbaarheid van kinderopvang en de impact op vruchtbaarheid in Vlaanderen en Brussel, 2001-2006", 2015-2016. (Co-supervisor) (Distinction: 13/20).

Bieke Joris, MA Social-Economic Sciences: "Arbeidsmarktdeelname en de transitie naar ouderschap bij koppels in België", 2016-2017. (Supervisor) (Great Distinction: 15/20)

Robine Grootjans, MA Social-Economic Sciences: "Genderpatronen in het gebruik van ouderschapsverlof ? de invloed op verdure tewerkstelling bij vrouwen", 2016-2017. (Supervisor) (Distinction: 14/20)

Koen Keizer, MA Sociology: "Tussen miskenning en erkenning. Een mixed-methoden benadering van kwetsbaarheid bij asielzoekers in detentie", 2018-2019. (Supervisor) (Great Distinction: 17/20)

Gineke Mampaey, MA Sociology: "Verschillen in het gebruik van ouderschapsverlof naar sector. Een mixedmethods benadering", 2018-2019. (Supervisor) (Great Distinction: 17/20)

Jasper Nijlunsing, MA Sociology: "A multilevel multivariate analyses of the underlying factors of the Matthew effect in childcare.", 2019-2020. (Supervisor)

Dries Adriaenssens, MA Sociology: "Bevolkingsdiversiteit en het gebruik van formele kinderopvang in Europese welvaartsstaten.", 2019-2020. (Supervisor)

Cécile Verdonck, MA Social-Economic Sciences: "Hoe kunnen vaders gestimuleerd worden om meer ouderschapsverlof te gebruiken? Een mixed methods onderzoek", 2019-2020. (Supervisor)

PhD dissertations

Julie Maes: 'Naar een betere arbeidsmarktpositie voor mensen met een migratieachtergrond.' ["Towards a Better Labour Market Position for Groups with a Migration Background"]: 01/10/2017-30/09/2021 (copromotor)

Tair Kasztan-Flechener: 'Arbeidsmigratie en Vergrijzing: een onderzoek naar de effectiviteit van de huidige inburgerings- en bemiddelingstrajecten voor nieuwkomers en personen met een migratieachtergrond in Vlaanderen.' ["Labour Migration and Population Ageing: analyzing the effectiveness of current labour market integration and job counselling trajectories for newly arrived immigrants and individuals with a migration background in Flanders"]: 01/10/2018 -30/09/2022 (copromotor)

[Wood Jonas, 2016, Essays on Socio-Economic Differentiation in European Fertility. The Impact of Economic Context and Social Policy, Brussels, University Press Antwerp, 222 p.]. Population, 71(4), 764-767. doi: 10.3917/popu.1604.0764

“Overall, by bringing together the different research chapters into one book, Wood succeeds exemplarily in highlighting the interplay between individual characteristics and institutional context and the importance of the latter for fertility decisions. He illustrates clearly and intelligibly that for highly educated women work-family compatibility is of major importance, while for women with relatively little education, exclusion from the labour market represents the major barrier to starting and enlarging a family. The author reaches this conclusion based on solid empirical modelling that carefully and correctly takes into account selection effects.”

- Prof. dr. Angela Greulich (Luci), Université Paris 1 Sorbonne.

Kreyenfeld, M. (2016). Jonas Wood: Essays on Socio-Economic Differentiation in European Fertility—The Impact of Economic Context and Social Policy. European Journal of Population, 32(4), 627-628. doi: 10.1007/s10680-016-9396-y

“The analyses presented in this book are solid, thorough and deep investigations. The language is clear and well balanced. Apart from the wide audience of fertility and family researchers, I think that the book is a great role model for dissertation projects and I can only recommend it to upcoming PhD students in the field of quantitative family and fertility research. The work combines careful demographic analyses with a sound application of statistical methods. Causal analysis is a difficult task in demographic analysis, where real experiments are out of question for good ethical reasons. We need to rely on observational data, and this thesis shows how to best tackle selectivity and endogeneity issues by various means.”

- Prof. dr. Michaela Kreyenfeld, Hertie School, Berlin.

Seminars, Guest Lectures & Invited contributions

Seminars:

Wood, J. (2012) Socio-economic differentials in European fertility what is the impact of social policies and economic context?, CELLO seminar, Antwerp 12 June 2012

Wood, J., Neels, K. (2014) Uptake of parental leave and effects on second birth hazards in Belgium, France and Germany: a shared frailty approach, Centre for Social Policy (CSP) seminar, Antwerp 28 February 2014

Wood J., Neels K. (2014) Educational differentials in European fertility. The impact of economic context and family policy., Max Planck Institute for Demographic Research, Rostock 9 October 2014

Wood J., Neels K. (2014) Family Policy, Maternal Employment and Fertility Outcomes: Socio-economic Differentials in Uptake and Effects of Childcare & Parental Leave in Belgium, Max Planck Institute for Demographic Research, Rostock 7 October 2014
